Chloe Martin, 18, Buckley

IT Apprenticeship

Cheshire and Wirral Partnership - Countess of Chester Health Park

Chloe Martin is currently completing an Estio IT Apprenticeship at CWP. This is her apprenticeship story...

"In my last few years at school I worked part-time for a catering company providing meals at local schools and care homes.

"I liked the feeling of helping vulnerable people in my local community. But when I got my school results it was obvious that my future was in IT."

Chloe contacted Estio and after completing a short interview began her two year IT Apprenticeship in

October 2015.

Estio found Chloe a placement at CWP. She's since completed a Microsoft Office Masters, as well as several courses in information, data and networking.

Chloe's work has also been recognised by the North West NHS Skills Development Network.

"I'm so glad that my placement has been at CWP. I've gained experience of working in a number of different teams and I've been able to learn so much in such a short space of time."

"I'm really happy with my apprenticeship. The work is great, the team are friendly and I'm basically getting paid to learn!"
